Passion for a high-pressure future, constant challenge and innovation

HIFLUX Co., Ltd. has been recognized for its technological prowess by successfully producing various of high-pressure piping materials that are difficult to manufacture domestically through continuous R&D and facility investment to open up new markets in the ultra-high pressure piping materials sector.

Based on differentiated technological prowess and price competitiveness compared to overseas manufacturers in Europe and the United States, it is growing into a global brand by concluding OEM supply contracts with domestic OEM suppliers and overseas global waterjet manufacturers.

In addition, in order to open up new markets, we have developed air-operated valves, high-pressured pressure regulators, back pressure regulators, and other fittings for various purposes and pressure-specific accessories, and now our products are being applied to mass production facilities in various industries.

Expanding R&D investment to achieve carbon neutrality

In order to contribute to carbon neutrality, HIFLUX has researched and developed manual valves for hydrogen refueling stations with pure domestic capital and technology, obtained KS certification, and is currently being supplied to hydrogen refueling station plant sites. It is also developing check valves and pneumatic valves (AOV) KS propulsion and valves for liquefied hydrogen.

In addition, based on its technology related to high-pressure piping for hydrogen refueling stations, it was selected as a hydrogen specialized company by the Ministry of Trade, Industry and Energy in 2024. We will continue to do our best to contribute to the development of the hydrogen industry through steady investment and marketing.

We will always listen to our customers' voices and contribute to productivity and quality improvement through continuous product improvement and service provision, and strive to become HIFLUX that can grow and develop together with our customers.

Thank you.

HIFLUX HISTORY

2024.05. Selected as a 'Hydrogen Specialist Company' by Government
 2023.10. Acquired 'KS certification for manual valve for hydrogen refueling station' by KGS
 2023.05. KS Q ISO 45001 certification
 2023.05. Selected as a 2023 HIFLUX Small Giant Company
 2021.08. Patent (Double-sealed check valve) acquired
 2021.07. Received a commendation from KGS
 2021.03. Patent (High-pressure valve) acquired
 2020.07. 'Material/Component/Equipment Specialist Company Confirmation' acquired
 2020.07. Patent (High-temperature/high-pressure valve) acquired
 2020.06. R&D (Valve and fittings for H70 hydrogen refueling stations)
 2020.04. Patent (Valves including stem carriers) acquired
 2020.02. 2 types of valve patents acquired
 2019.01. Joined the Korea Hydrogen Industry Association
 2018.09. Moved to new headquarters and factory in Daedeok Techno Valley
 2018.08. Acquired 'Venture Business Certification' from the Technology Guarantee Fund
 2018.02. HIFLUX acquired European Standard Certification (CE)
 2016.09. Self-developed 3 types of high-pressure valves
 2016.04. Self-developed high-pressure Trunnion Ball Valve
 2015.11. Self-developed high-pressure relief valve
 2015.11. Factory expansion
 2015.10. High pressure manifold block, high pressure ball valve self-development
 2015.08. High pressure relief valve, high pressure needle valve self-development
 2014.07. Corporate research institute certification
 2013.10. KS Q ISO 9001 certification, KS I ISO 14001 certification
 2010.05. Establishment of HIFLUX

Relief Valve - Factory Set

Safety valve that protects the system by venting the pressure when over pressure occurs

Relief Valve Factory Set products are valves that protect the system and other devices by releasing pressure when the internal pressure of the system rises above the set pressure due to system malfunction, etc. The set pressure (customer-specified) is set to the requested pressure before shipment and is sealed with a pressure tag.

Features

- Pressure Range : 3,000 psi ~ 60,000 psi
 - Setting Pressure Range : $\pm 8\%$
 - Inlet Port : H6009(Orifice size : $\varnothing 6.4$)
 - Outlet Port : 1/2" NPT
- Standard Material : Stainless Steel
 - O-ring Material on Piston : Viton
 - Max Operating Temperature : 160°C

Relief Valve - Field Adjustable

Safety valve that protects the system by venting the pressure when over pressure occurs

Relief Valve Field Adjustable products protect the system from overpressure by releasing pressure when the internal pressure of the system rises above the set pressure, and the pressure setting can be easily adjusted at the field by the customer directly adjusting socket set screw on the top of the valve.

Features

- Pressure Range : 1,000 psi ~ 10,000 psi, 10,000 psi ~ 20,000 psi
- Setting Pressure Range : $\pm 8\%$
- Max Working Temperature : $-20^{\circ}\text{C} \sim 65^{\circ}\text{C}(\text{NYLON}) / -20^{\circ}\text{C} \sim 160^{\circ}\text{C}$
- Inlet Port : 1/4" NPT, H2004
- Outlet Port : 1/4" NPT
- Orifice Size : $\varnothing 1.8$
- Adapters allow connection of pipes of various pressures and sizes

➤ HOW & WHERE

➤ Dimension Table

How it works

The relief valve opens when the pressure applied to the stem exceeds the set pressure, and closes when it falls below the set pressure.

WHERE

- Where you want to protect the system from over pressure caused by system malfunction.
- Where you want to control over pressure caused by thermal expansion.
- Where low discharge is not a problem in a system where high pressure is applied.
- Where perfect flow blocking without leakage is required.

WHERE NOT

- Pressure ~ 1,000 psi or less.
- Systems where discharge capacity must also increase as pressure increases.
- If the back pressure occurs at the drain port.
- Corrosive liquids or gases that can damage the valve, cryogenic fluids or gases such as liquid nitrogen.

Relief Valve - Proportional Type

Safety valve that protects the system by venting the pressure when over pressure occurs

Relief Valve Proportional Type products are valves that open gradually as the internal pressure of the system increases. Since the flow rate increases as the differential pressure increases, they can be used in systems where the flow rate is high or the pressure suddenly increases rapidly.

Features

- Pressure Range : 1,000 psi ~ 15,000 psi, 1,000 psi ~ 20,000 psi
- Setting Pressure Error Range : $\pm 8\%$
- Inlet Port : 1/2" NPT, H2009 (9/16")
- Outlet Port : 1/2" NPT
- Orifice Size : $\varnothing 6.3$
- Standard Material : STS316
- O-ring Material on Piston : Viton
- Max Operating Temperature : 160°C
- Adapters allow connection to pipes of various pressures and sizes
- Stable sealing is possible by using PEEK stem
- Pressure setting can be adjusted by the customer by adjusting socket set screw on the top of the valve

Low Pressure Port Type

➤ Sleeve Type Connections - 10,000 psi / 15,000 psi

Sleeve Type is a method of attaching a sleeve inside a gland and can be used on 1/8", 1/4", 3/8", and 1/2" pipes. The tubes used for connecting products can be ordered from HIFLUX Mall and are made of stainless steel to ensure optimal performance in high-pressure environments.

Ultra High Pressure Port Type

Ultra High Pressure Connections - 100,000 psi / 150,000 psi

The product is connected using a collar and nipple within the gland, and the corresponding pipe sizes are as follows. This Cone and Thread method connection is the optimal sealing method, and it provides reliable performance for both liquids and gases at high pressures and temperatures, and is the standard for easy and quick high-pressure equipment configuration.
